Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

bravo disc publisher primera manual

Each listing in the Table of Contents is interactive. Place the cursor on either the words or the page number. A small hand with a pointing finger icon appears. For exam ple there are no special instructions for burning Bluray discs if you have a Bluray model. The software simply recognizes that you have Bluray capable drives and adds the media type to the list of available media to burn. Press it quickly to turn power back on. When already powered on quickly pressing the power button will open and close the printer tray. This includes information on how to load the supplies ink and disc media necessary to start producing discs. A. INSTALLING THE PC SOFTWARE The Installer Disc has a menu that will guide you through the process of setting up your Publisher. Hardware and Software Setup. To verify the driver installed or reinstall go to the Mac System Preferences Apple System Preferences. Open the cartridge cover by pressing down on the tab. Step 5 Aligning the Car tridge If you are using a PC the Installer will prompt you to align the cartridge. For PC, SureThing CD Labler is used to design the image to print on the disc. For Mac, Disc Cover is used to design the image to print on disc. For Mac and PC, PTPublisher controls the recording and allows you to select the image to be printed to your discs. Step one of the Copy Disc wizard will be displayed. 2. You will be prompted to place the disc you would like to copy into the drive inside the Disc Publisher. For Primera TuffCoat branded discs simply choose your media from the drop down list, the settings will be adjusted accordingly. All Primera media is automatically defaulted to the best print quality. Other media may also accept the best quality setting. However, with some media you may have to print at a lower print quality to eliminate smudging and bleeding. Some lower quality media can not hold all of the ink that is printed at the highest quality settings. This method eliminates the need for a master disc.http://rabotatver.ru/userfiles/admin/craftsman-lawn-mower-manual-650-series.xml

This is the label that will appear when this disc is inserted into a computer drive. When you have selected the data you would like to burn click the next button. Disc from other manufacturers vary widely regarding how far the printable surface extends to the edge of the disc. Measure the distance from the edge of the disc to the start of the white printable area. This will be between 0 and 2 mm in increments of.1mm. This is only available with multiple robots connected.TrackatOnce. This is the default. For track at once, the laser is turned off after each track, which produces a twosecond gap. The trackatonce feature, enables songs and data to be written at different intervals. The leadin sectors that are written at the beginning of each session contain the location where additional data can be placed on the disc. This operation may be useful to verify software installation discs where it is extremely important to have accurate copies of all installation files. Checking this option will double the time it takes to record each disc. Set Time and Date to Mastering Time. To queue another project to run after the current one is finished simply setup the project as you normally would. When you get to the third step of the project setup wizard, if a project is currently running a Queue button will appear instead of a Go button. Important Note It is not possible to span a single large file over multiple discs. Click Schedule Project to convert this data project into a backup project. You will be

prompted to save your project. Do not move projects once you have saved them. Always choose only one copy even if your project will be spanned across multiple discs. Check the box next to the backup project you would like to run. Click Run Now to run it for the first time now. Otherwise, the backup project will proceed at the scheduled time. You must keep the PTPublisher software open, the Disc Publisher turned on and the discs loaded for the automatic scheduled backup to occur.http://www.comunidad-e3d.com/fckeditor/craftsman-lawn-mower-manual-675-series.xml

You can protect an existing Master DVD by first converting it to an ISO image using PTPublisher or you can protect a DVD. You can use SureThings Smart Designs to quickly label a disc, or easily import your own design in many popular file formats. The Help section included with the software will provide complete instructions on all the features in this package. Add text by selecting one of the options below. To create text that follows the curve of the disc choose Add Circular Text. 4B. You may also choose from several SureThing smart designs. There is no way to open Disc Cover PE outside of the PTPublisher software. 2. To add a background from Disc Cover, click the the Gallery button on the top tool bar. Below is a short description of each of the important buttons. Gallery Clipart Selection Zoom. Select the objects you would like to edit and then click on one of the six buttons on the top of the inspector. Four are shown below. These settings affect the print quality of your discs. The default settings of the Publisher printer driver will fit most printing needs. The remaining options apply if you have purchased the business card adapter kit. Nonprintable Outer Margin Adjust this value to print all the way to the outer edge of a CD. This is useful if you are printing full coverage images. Images printed in this mode will look more vibrant because more ink is being used to produce them. However, printing images of people may produce skin tones that have a reddish tint. It is important to perform this calibration every time you change a cartridge. Change Cartridge Select the Change Cartridge button to install a new ink cartridge or to switch back and forth between previously used cartridges. Go to file print. Select Publisher Settings from the copies and pages drop down menu. Click Save as Defaults when you are finished. When printing onto the Primera ToughCoat discs, 96% is usually sufficient.

When printing on to other brands of media, or if you would like to print darker colors, you may wish to increase the Intensity setting. The size of the print able surface can vary from one type of media to the next. This allows you to set the outer margin in millimeters allowing you to print all the way to the edge regardless of the type of disc you are using. Clicking the Clean Cartridge button will cause the Publisher to pick a disc and place in into the printer tray. To center the image, click the Image Alignment button. You will be prompted with a choice to print a test print or simply enter values to nudge the image alignment on the disc. For instance, on the disc shown in this manual, the vertical alignment is 2 and the horizontal alignment is 0. When printing and burning through the PTPublisher software your Publisher will support the following additional stardard label image file formats BMP, TIF, JPG, GIF, PNG and PRN. These formats can be exported from most any original graphics format such as Adobe Photoshop or Illustrator. In this mode, the Robotic Disc Transporter will go through the motions of picking and placing a disc to ensure proper working order. This test may be performed without connecting the Publisher to the PC. Click on the icon in the upper right corner of any screen. Each listing in the Table of Contents is interactive. Place the cursor on either the words or the page number. A small hand with a pointing finger icon appears. A wide variety of disc formats are supported, including audio CDs, Video Cds, data discs and more. Operation is simple and completely automatic once a job has been started. Make sure that all supplied accessories are included with your unit.When already powered on quickly pressing the power button will open and close the printer tray.The Robotic Disc Transporter will lower the disc into the Printer Tray, and the Printer Tray will then automatically close. 6.

http://gbb.global/blog/4-post-lift-installation-manual

If publishing more than one disc, the Robotic Disc Transporter will load the Recorder Drive with a

blank disc from the Input Bin to start recording the next round. You can check with your system administrator or check with Apple support to confirm whether or not your account has administrative rights. Refer to Section 3D and 4D for further printer driver information. You may see a notice like the one shown here stating that the Printer has not passed Windows Logo Testing XP or Windows cant verify the publisher Vista. Click Continue Anyway or Install this driver software anyway to continue installing the printer driver for your Publisher. SureThing CD Labeler is used to design the printing on your discs. PTPublisher controls the recording and allows you to select the image to be printed to your discs. Both applications will be described in detail in this section. Verify this information is correct and click the next arrow to continue. 4. You may add any BMP, JPG or SureThing .std file. SureThing files are automatically formated correctly.Using the buttons on the left navigation window, you may add your own background, choose a premade back ground, choose from several text effects or insert a picture. Click the down arrow on the button to view all options. If you are not using media sold by Primera you can adjust these settings by changing the quality setting or toggling the size of the printed outer margin or inner diameter. You can save your adjusted settings by clicking Save my Media. Refer to the following for a description of each area. Open Project Panel This panel allows you to open a previously saved project. It will also display the last few saved projects. To open or close this or any panel click on the down or up arrow upper right corner of the panel. The current status is also displayed. Important errors such as low ink will be displayed here.

https://www.micromegamondo.com/images/8dh10-manual.pdf

Status Bar The Status Bar shows key information such has ink levels and media supply levels for the currently selected robot. You can use SureThings Smart Designs to quickly label a disc, or easily import your own design in many popular file formats. The Help section included with the software will provide complete instructions on all the features in this package. Please refer to the following steps to change or verify your printer driver options 1. Click the Start button. For Windows 2000 point to Settings and click on Printers. NOTE The PTPublisher application allows you to adjust some of these set ting directly through the Add a Print file screen in that application. In PTPublisher you also have the option to Use Driver Defaults. The remaining options apply if you have purchased the business card adapter kit. Nonprintable Outer Margin Adjust this value to print all the way to the outer edge of a CD. This is useful if you are printing full coverage images. It is important to perform this calibration every time you change a cartridge. You can use this adjustment if you need to finetune this location. If you ever wish to verify your factorycalibrated Vertical. Be sure to have a disc in the Publishers input bin and the front cover closed. The test pattern purges ink through nozzles of your ink cartridge to clear any blockages. Click Reset Factory Default to set all print centering and cartridge alignment settings back to factory defaults. Enable Bidi Printing Set this option to Yes for faster printing that requires cartridge alignment. Place your master disc in the Publisher Drive. Click the Print Image on Discs button to enable printing. These settings are described in detail in Section 4D of this manual. Once you are in one of the main three project types you may choose any of the other available project types by clicking the drop down box at the top of the screen and selecting one of the projects. Use this project type to create a data DVD for a Mac and a PC.

http://petroenterprise.com/images/8dq1-manual.pdf

If you have not yet saved your project, you will be prompted to do so at this time. The Robot Write Window described in section 4B.5 will be displayed. Print settings are explained in more detail in section 4D. Other settings on this screen can usually be left at their default values. The driver will center the image and automatically crop it to the shape of a CD. This means you do not necessarily need a template to create a CD in your favorite graphics program. You can access the driver settings. In Publisher Settings you will find a button to launch the Configuration Utility. The

Publisher will then print a simple pattern that will flush ink through the nozzles. The test pattern will also show you if any nozzles are clogged. INDEX SAME must tough lines whose enter. For instance, on the disc shown in this manual, the vertical alignment is 2 and the horizontal alignment is 0. This type of cleaner is very effective on inks that may accumulate on the printer tray. Stronger cleaning solutions are NOT recommended because they may damage the paint and plastic materials from which the parts are manufactured. In this mode, the Robotic Disc Transporter will go through the motions of picking and placing a disc to ensure proper working order. This test may be performed without connecting the Publisher to the PC. Source Primera Knowledge Base PTPublisher Software Help files SureThing Software Help files Email Support Chat Support. Register a free business account Please try your search again later.As such, cartridge recycling is provided at no charge, throughout the world, for the life of the product. The result is less solid waste with fewer resources consumed.Any returned computer that is damaged through customer misuse, is missing parts, or is in unsellable condition due to customer tampering will result in the customer being charged a higher restocking fee based on the condition of the product. Amazon.com will not accept returns of any desktop or notebook computer more than 30 days after you receive the shipment. New, used, and refurbished products purchased from Marketplace vendors are subject to the returns policy of the individual vendor. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. The Bravo 4202 is that kind of product, and heres why. First, its a great price for what you are getting. All Primera products are. They always have the lowest price of any comparable automated inkjet disc publisher, and while the ink costs are a little spendy over the long haul, most people dont care once they get past that first purchase of the machine. Secondly, they print really, really fast. We had one in the office here as a demo unit when they first came out, and Primera was boasting about some crazy fast print speeds. Well., this thing prints crazy fast. I dont know if I would recommend the highest speed, which is about 6 seconds per disc, but the middle setting which is about 10 seconds is really nice, and still crazy fast. Finally, these Primera Bravos are really easy to set up and get working fast.

Its a simple USB connection, the software is simple to setup and navigate, so youll be creating discs about 15 minutes after you open the box. Maybe thats why I recommend it them most. This machine is so easy to setup and use, and has the instant gratification of the fast print, that my friends dont call and bug me for help. Click here to find out if you qualify for a special discount program. At just six seconds to print each disc with 100% coverage in nearperfect quality, youll be stunned at how fast it will complete your jobs. The 4200Series utilizes proven Primera automation for rocksolid, reliable, and fast performance, and operation that is smooth and quiet. With up to 4800 dpi quality, the Bravo 4200Series has the highest printing resolution of any disc printer or publisher on the market. WaterShield discs are highly water, scratch, and smudge resistant. The glossy finish and vibrant color will make the DVDs you rent look cheap. Virtually all other brands of inkjetprintable optical media are also supported. On Bravo 4200Series, its an automatic, builtin feature. On some competing units, you have to manually open a door or a drawer every time you need to retrieve a finished disc an enormous inconvenience if youre doing it all day long.With Bravo 4052 Blu, Bravo 4201 Blu or Bravo 4202 Blu, you can record highdefinition video, as well as perform backups of files, photos, video and more. Youll always know the status of your jobs, whether youre sitting next to the unit or standing on the other side of the room. Primeras PTPublisher Software has won critical acclaim for its simple, wizardstyle interface. Training new operators takes just minutes instead of hours.Three free protections are included. Primera makes integration easy with a simple yet comprehensive Software Developers Kit SDK for both Windows and Mac. The SDK is free to qualified developers. Call 18009444237 or send us an email for more information, or place your order online today.
