Chapters 4 onward explain the advanced functions, letting you learn more as you read each chapter. Checking the Package Contents.2 Read This First.3 What Do You Want to Do.4 Conventions Used in This Guide.8 Safety Precautions.9. The latter part of this chapter explains how to shoot and view images in Easy Mode, how to shoot and view movies and how to transfer images to a computer. Be sure to charge the battery as it is not charged at the time of purchase. CB2LX CB2LXE To protect the battery and prolong its life, do not charge it for longer than 24 hours continuously. SD, SDHC and SDXC memory cards have a writeprotect tab.Since the dates and times recorded into your images are based on these settings, be sure to set them.What if the clock appears when the m button is pressed. The clock will appear if too much time passes between pressing the and the n button in Step 2. If the clock appears, press the m button to remove the clock and repeat Step 2. Formatting initializing a memory card erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. The camera can also detect and focus on faces, setting the color and brightness to optimal levels. If this happens, try shooting in G mode p. To reduce reddyeye and to assist in focusing, the lamp may light when shooting in dark areas.Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. The last image you took will appear. Choose an image to erase. This prevents incorrect operation of the camera, allowing even beginners to take worryfree pictures. This prevents incorrect operation of the camera, allowing even beginners to view and erase images without worry. The audio will record in stereo. If you continue shooting for a long time, the camera may become warm. This is not a malfunction. Different scene icons will appear. Under certain conditions, the icon that appears may not match the actual scene.

System Requirements Windows Windows 7. Transferring Images to a Computer for Viewing Install the Software. Some accessories are not sold in some regions, or may no longer be available. Power Supplies CAUTION RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. This product is designed to achieve excellent performance when used with genuine Canon accessories. P, Tv, Av, M Mode You can make settings such as the shutter speed and aperture value in order. Refer to pp. 164 165 for details on information that appears on the screen. Shooting Information Display Playback No Information Simple Information Display You can also switch the display by pressing the l button while the image displays shortly after shooting. However, the brightness of the image on the screen, and the brightness of the actual image recorded may be different. Available Options Menu Items Choose a shooting mode. The menu items are organized under tabs, such as for shooting 4 and playback 1. Are there functions that cannot be reset. Performing a low level format on initializing a memory card erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before performing a low level format on the memory card. When stopping low level formatting, the data will be erased but the memory card can be used without problem. Shooting in Special Scenes The camera will select the necessary settings for the conditions in which you wish to shoot when you choose the matching mode. Shoot with the Effects of a FishEye Lens Fisheye Effect Lets you shoot with the distorting effect of a fisheye lens. Since you may not achieve the expected results depending on the shooting conditions, try taking some test shots first. What if a smile is not detected. Smiles are easier to detect if the subject faces the camera, and opens their mouth enough to show some teeth when smiling. The camera will shoot approximately two seconds after it detects a wink. Press the l button to accept the setting.

## ***PowerShot G10***

Even if your face is not detected after joining the subjects, the shutter will release approximately 15 seconds later. What if the indicator blinks orange and a flashing When you press the shutter button halfway in low light conditions where camera shake is likely, the indicator will blink orange and a flashing screen. The images may appear coarse, however, depending on the recording pixel setting p. 72 and the zoom factor used. The images may appear coarse, however, depending on the combination of recording pixel p. Once inserted, however, they cannot be deleted. Be sure to check beforehand that the date and time are correctly set p. 19. You can insert and print the shooting date in images which do not have an embedded date and time as follows. The camera will activate approximately 10 seconds after the shutter button is pressed. You can change the delay time and number of shots p. 79. Press the p button. AE stands for Auto Exposure. What if the shutter speed and aperture value appear in orange. If a correct exposure cannot be obtained when pressing the shutter button halfway, the shutter speed and aperture value are shown in orange. Auto Automatically sets the optimal white balance for the shooting conditions. Day Light Fine weather conditions, outdoor shooting Cloudy Cloudy, shady, twilight conditions Tungsten. My Colors Off Emphasizes the contrast and color saturation for a vivid Vivid impression. Neutral Tones down the contrast and color saturation for neutral hues. Sepia Sepia tones. Shooting Using the Two Second SelfTimer The camera will shoot approximately two seconds after the shutter button is pressed, avoiding any camera shake that occurs when pressing the shutter button. TV display is not available when using HDMI Cable HTC100 sold separately to connect the camera to a highdefinition TV. After locking the focus, the focal distance will not change even when you release your finger from the shutter button.

<http://jlsvnavoja.com/images/c200-w203-manual-pdf.pdf>

Shooting with Servo AF While the shutter button is pressed halfway, the focus and exposure will continue to adjust, allowing you to take pictures of moving subjects without missing a shot. Suitable for standard shooting conditions, including back lit shots. Evaluative Automatically adjusts the exposure to match the shooting conditions. At the same time, you can use a slow shutter speed to brighten the background that the light from the flash cannot reach. The camera will set the appropriate aperture value for the shutter speed you set. M stands for "Time value". The camera will set the appropriate shutter speed for the aperture value you set. B stands for "Aperture value", which refers to the size of the aperture opening inside the lens. D stands for "Manual". Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression when shooting. Redeye correction may be applied to areas other than red eyes. Safety FE The camera automatically changes the shutter speed or aperture value when the flash fires to avoid overexposing and blowing out the highlights in the scene. You can also set the flash output from the 4 tab. However, depending on shooting conditions the image may become coarse, or the colors may not come out as expected. Color Accent You can choose to retain a single color and change the rest to black and white in a composition. This function is not available when a TV is used as the monitor p. 80. Choose x or v. You can also jump by the shooting date Scroll Display. Viewing Images in Filtered Playback When there are many images on the memory card, you can filter and display them by a specified filter. Filters that do not contain any images cannot be chosen. Filtered Playback You can filter images during a slideshow p. 113 so that only certain images will play back. Each image displays for approximately 3 seconds. If you keep the qr buttons pressed, you can fast forward through images.

You can set a slideshow to repeat, or change transition effects and the time that slideshow images are displayed. You can choose from six transition effects when switching between images. Press the l button, and switch to the focus check display p. 44.. White Yellow Yellow White What if the images don't properly display on the TV. The supplied stereo AV and interface cables and the separately sold HDMI Cable HTC100 cannot be plugged into the camera simultaneously. This could cause the camera to malfunction. If you choose one of those images, the camera will choose four more images letting you enjoy the playing back of images in an unexpected order. This will work best if you take many shots of various scenes. Protected images cannot be erased with the camera's erase function.

To erase an image, cancel protection first. Since erased images cannot be recovered, exercise adequate caution before erasing. Protected images p. 120 cannot be erased. Tagging Images as Favorites When you tag images as favorites, you can easily categorize just those images. You can also filter out just those images for viewing, protecting or erasing p. Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression. Canon Brand PictBridge Compliant Printers SELPHY series PIXMA series. Printing will start. You can print from a print list simply by connecting your camera and printer. These selection methods comply with the DPOF Digital Print Order Format standards. These selection methods comply with the DPOF Digital Print Order Format standards. The first part of this chapter explains convenient and commonly used functions. The latter part explains how to change shooting and playback settings to suit your purposes. Setting a Recorded Image as the Startup Screen Image When you press the 1 button and set the camera to Playback mode, you can register an image.

Contents show 1 An Introduction to Canon PowerShot SX50 HS Manual 1.1 The Overall Look of Canon PowerShot SX50 HS 1.2 The Specification of Canon PowerShot SX50 HS 1.2.1 Canon PowerShot SX50 HS Quick Specification 1.3 The Price and Impression of Canon PowerShot SX50 HS 2 Canon PowerShot SX50 HS Manual User Guide An Introduction to Canon PowerShot SX50 HS Manual It is such a perpetuation that a product, especially for the digital camera product, can't be separated from its manual. By using this manual, user will be able to understand about their product deeper. Therefore, operating and treating the camera better will be something possible. This is exactly why we provide the Canon PowerShot SX50 HS Manual. The only aim is to educate the users of this camera to use this product better so that they can result a good photographical image. The Overall Look of Canon PowerShot SX50 HS Look

is something important that becomes a consideration for people in buying digital camera product. With the look, People can instantly attracted to a certain digital camera product. More than that, sometimes the choice of camera look is also reflecting the personality of owner as well as the classiness of the camera itself. So, before we hit the Canon PowerShot SX50 HS Manual User Guide directly, now we are going to talk about the look of this camera first. Because of the Big Zoom capability, this camera's body is bulky, just like a DSLR camera. It's even chunkier because of the added lithiumion battery that is placed right at the handgrip spot. Although the handgrip is a bit shallow for a large plastic body, you can still hold it in comfort.

The dimensions of Canon PowerShot SX50 HS are similar with the predecessor. From the looks, this improved camera looks subtly different. The grip is much deeper than before. The body is also less chunky and less muscular. With those changes on the body, it makes you get the hold to be more secured. Some people might not be pleased with the plasticky body. The rubberized grip would be better for this camera. And base on the Canon PowerShot SX50 HS manual, the construction is solid and robust which makes this camera is strong enough. The Specification of Canon PowerShot SX50 HS Canon still continues to give great camera features and designs to their collection. There was a time when every company battled for the megapixels. They were competing to have the best megapixel they can. That kind of battle is not up anymore, they have the new aspect to battle for. It is the "zoom" aspect. They are competing to have the camera with the greatest zoom quality. The power of the camera lenses are being tested in this kind of battle. Canon has joined the competition by releasing SX series camera. The rival of this Canon PowerShot SX50 HS is the one from Nikon, it's the Coolpix P510 that has the super zoom capability of 42 times. This camera from Canon is the replacement of the previous camera, SX40. There are bunch of features that this Canon PowerShot SX50 HS has to offer. Based on the Canon PowerShot SX50 HS manual, the huge optical zoom of 50x is the main attraction of this camera. The performance of the optical zoom is supported by the Intelligent IS stabilization system. This is the system that is originally made by Canon. That system is the result of combination between lensshift and digital stabilization. That combination would give you the stops of benefit up to 4.5 for exposure privilege. That's the huge amount of zoom you could get from this Canon PowerShot SX50 HS.

Some of the disappointment of this camera is the issues with focusing that sometimes disturbing for some photographers. The quality of EVF is quite poor, which becomes big issue in this camera. You can get this camera on Amazon for 430 dollars. Canon PowerShot SX50 HS Manual User Guide As we stated at the beginning of this article, the aim of providing this writing is to bring the Canon PowerShot SX50 HS Manual. This is the manual that will give you the information related to the specification, features, operation, instruction, camera manual, and others.
